

## VILLAGE OF BARRINGTON HILLS

### SEPTIC SYSTEM INSTALLATION PROCEDURES

The following standards and procedures shall govern the installation of all septic systems within the Village of Barrington Hills.

#### 1. Septic System Installation

- A. The Illinois licensed Professional Engineer responsible for the system design shall lay out the system or verify the system layout prior to commencing construction.
- B. The Illinois licensed private sewage disposal contractor shall install the proposed system according to the latest Village-approved plans.
- C. The engineer shall assure that the septic system is constructed in accordance with the latest Village-approved plan.

#### 2. Village Inspection

- A. After the engineer has inspected and determined that the system has been constructed according to the latest Village-approved plan, the engineer or contractor shall contact the Village of Barrington Hills Building Department at 847-551-3003 to schedule the Village inspection.
- B. All construction shall be left uncovered until the Village inspection has been completed.
- C. After Village inspection approval has been given and dimensioning of the system components and permanent ties to the extremities have been noted by the engineer, the contractor can then backfill the septic system.

#### 3. Septic System Records

- A. Record drawings shall indicate dimensions of the components and permanent ties to the extremities of the system.
- B. The engineer shall provide 2 signed and sealed copies of the Record Drawings of the installed septic system to the following:

Building Officer  
Village of Barrington Hills  
112 Algonquin Road  
Barrington Hills, IL 60010-5199
